

AMENDMENTS TO THE SPECIFICATION

Delete the paragraph at page 18, lines 9-13 and insert the following:

B1 The cells can then be moved to clean media. In a preferred embodiment, where the cells are adherent, ~~they~~ the cells are trypsinized to free the cells from the extracellular matrix which may contain phage antibodies that bind the extracellular matrix. Freeing the cells into solution permits more through washing and moving of the cells to a new culture flask will leave behind any phage that may have stuck to the tissue culture dish.
